

CASE STUDY

A consultant's go-to biometrics CRO

Over the past several years, PharPoint has worked closely with a clinical operations consultant who has brought our team in as the biometrics CRO across multiple sponsor programs. To better understand why she continues to involve PharPoint when supporting sponsors, we asked her to share a few thoughts about the partnership. Her perspective is shared below in her own words.

What have you most appreciated about working with the PharPoint team?

"In the past, there was a real lack of transparency from the DM/Stats vendors I have worked with. PharPoint is very open and supportive, if they can do it they will – and on time, within budget. The level of quality is second to none and is consistent from project to project."

What has exceeded your expectations since working with us?

"The team members, the communications, the hard work and dedication of the PharPoint staff is all second to none."

What have you been able to achieve since working with PharPoint?

"PharPoint has been helpful in study rescues, high priority pivot studies locked and delivered faster than any other CRO I have worked with in my experience."

What is the main reason you recommend working with PharPoint?

"It is simple: quality, timeliness, and professional, qualified, and competent team members."

"In short, **PharPoint is my go-to first line for any Data Management or Biostats work** that I need done in any company I work in (biotech and pharma). When I have the opportunity and freedom to choose my CROs or Vendors, PharPoint always has a seat at the table for those two services."
