

Supporting Congestive Heart Failure (CHF) Clinical Trials

CHF trials are complicated, perhaps more similar to the complexity of an oncology trial rather than a typical cardiovascular study. CHF studies typically have a high probability of adverse events and are administratively demanding for clinical trial sites.

HANDLING COMPLEXITY

PharPoint has experience managing complex trials with large amounts of data.

SELECTING SITES

We support better enrollment by identifying and engaging sites.

MAINTAINING COMPLIANCE

Our team works alongside sites and Sponsors provide patients the support needed for the chronic progressive nature of CHF, increasing overall subject protocol compliance.

Partner with a CRO that has the right experience to successfully support a CHF trial.

Work with study team members who have first-hand experience overcoming common study challenges associated with CHF trials

RECENT SUCCESS STORY:

PharPoint recently successfully rescued a full-service cardiovascular trial.

“There is an inherent honesty and authenticity in their approach, and as a result, I have complete faith and trust in PharPoint as our partner, and that gives me confidence in the success of our clinical program.” — CLIENT TESTIMONIAL

How can we support your upcoming trial?

- Clinical Consulting
- Site Feasibility
- Clinical Operations
- Medical Monitoring
- Vendor Management
- Data Management
- Biostatistics & Statistical Programming
- Medical Writing
