

EXPERIENCE OVERVIEW

Supporting Leukemia/ Lymphoma Trials

About PharPoint

PharPoint Research is an award-winning and client-focused contract research organization (CRO) that offers site feasibility, clinical operations, data management, biostatistics, and statistical programming services to clients of all sizes.

Founded in 2007, PharPoint's team has participated in over 1,000 clinical trials with a high business repeat rate.

EXPERIENCE

Supporting Oncology Studies

The PharPoint team has extensive experience supporting leukemia, lymphoma, and MDS clinical trials, including:

200+ oncology trials supported since 2007

40+ leukemia, lymphoma & MDS trials supported

2 successful oncology regulatory submissions in the past 3 years

Access to **board-certified oncologists** and experienced in-house clinicians

Experience providing Clinical Efficacy Review Committee support for **50+ studies**, including leukemias and lymphomas

Industry-leading biometrics timelines, allowing you to get results **31 days faster** than industry average

Set your study up for success with support from our team.

Our team has experience overcoming the common obstacles that leukemia, lymphoma, and MDS studies encounter, including:

Keeping your study top-of-mind at in-demand sites.

Identifying your ideal sites is only the first step. PharPoint has experience working with top-rated oncology sites across the United States and leverages our relationships and best practices to keep your study top-of-mind.

Seamlessly managing a logistically complicated study

The PharPoint team has experience in cohort management along with experience managing complicated logistics, and is capable of mitigating risk and avoiding delays.

Supporting the need for increased safety monitoring

Our monitors are equipped with a preexisting comprehension of the CTCAE grading associated with toxicity management, and they understand the impact that the interpretation of results has on overall safety reporting and data analysis.
