

Supporting the fight against COVID-19

PharPoint is proud to be a trusted CRO for sponsors in the fight against COVID-19. In addition to our growing COVID-19 work, the PharPoint team has an extensive background in infectious disease, including numerous Ebola and Influenza studies.

320+
infectious disease studies supported by PharPoint's biometric teams since 2007

10+
COVID-19 studies supported

★ **2020** Triangle Business Journal Life Sciences Award Winner

★ **2019** Scrip Awards Best CRO - Specialist Providers Finalists

915+ total studies participated in with a **95% business repeat rate**

Shorter Time to Results

Throughout your study, clean data are soft locked, reducing the number of subjects needing to be locked following Last Patient Last Visit (LPLV) & decreasing the timeline to database lock to 5 days after SDV – 31 days faster than the industry average.
